

PRE-SHOOT GUIDE

LucyB Photography

Introduction

A STEP BY STEP GUIDE ON
WHAT TO DO THROUGH
OUT THE WHOLE SHOOT

It's as simple as...

1

Book in a time and date that is best for your shoot. You will also need to decide whether you want a location shoot or a home shoot.

2

Once that is all decided and booked in, we will decide a time to have a call to discuss everything you would like in your shoot.

3

Now it's time for your shoot! Make sure you pack everything you need and arrive 15 minutes before the shoot time.

Location Shoot

Location shoot's are a great way to explore the parks and nature in your area.

We can meet up, roll in the leaves, play in the breeze and just have a great time.

This hour and a half session will help you get some lovely photos to cherish forever.

At Home Shoot

These shoots are done within the comfort of your own home.

This helps people relax and feel comfortable in their own home.

Gardens to living room. We can have a dressing up party, or we can have a lounge on the sofa, or we can cook and bake in the kitchen. The day is up to you.

Let's have a chat!

Once you have booked in your shoot (deciding whether it is an "at home shoot" or "location", all you will need to do is fill in a form that let's me know who's coming and where we will be there.

Once that comes through, I will book a time to have a chat about the shoot and have a chance for you ask any questions.

We will have a zoom call to discuss everything.

Now that everything is booked in and our zoom call has been done, we will get packed and ready for the day. Whether the shoot is on location or in your own home, we recommend a couple of things for your shoot to go smoothly!

- Make sure you are always 15 minutes early to your shoot
- Nobody likes to see pen marks, make sure it is all smudged off
- Make sure the kids have eaten and had a good night's rest, it always makes the day go smoothly
- It isn't always possible, but pack the night before, it may help the morning run better

It's show time

Especially for newborn shoots, we reccomend bringing any personal bellongings that mean a lot to you. A blanket, teddy, everyting is welcome.

What to bring?

What to Wear?

I always love seing people being themselves. If your kid loves dressing up as a fairy princesses, or spiderman has made an apperance, fully embrace it. Of course, matching outfits are always a bonus.

Common Questions

How long is the shoot?

The shoot normally lasts an hour to an hour and a half to make sure we capture all the moments and show the personality of your little cheeky monkeys.

What is the next step after the shoot?

After the shoot, I will put together your collection of photos and within a week or so, we will book a time for you to view your images. This is normally done via Zoom. This is a perfect opportunity to get the whole family together to see the kid's cute little faces. This is where you are able to purchase the photos.

How much are the products?

My prices start from £20. I sell prints and digitals as well as a couple of packages depending on what you are looking for. I am always happy to create a package to suit what's best for you.

Why me?

I have a genuine love for photographing and documenting memories and bringing out the beauty in everything.

After having a hard time to get the confidence to even be in front of the camera, I grew the love I had and want to share that with others.

That passion to make everyone feel beautiful in front of the camera, is a massive goal I strive for. My main objective is for everyone to eventually love themselves in front or behind the camera.

"Lucy was incredible during the shoot, she made us feel comfortable and at ease especially when trying to get pictures of a tired 1 year old which seemed an impossible task but Lucy did amazing getting his attention and the pictures turned out beautiful"

What some people have been saying!

"Absolutely can't recommend Lucy's amazing talent enough! We have used her a few times now and would not go anywhere else. Always makes you feel comfortable and confident with what's happening in the shoot. She is also fabulous with babies and captures some truly special memories even when it causes a cake smash style mess!"

**Can't wait to
make memories
with you soon!**
